# GemOro CZ Master Set Pro™

For Diamond Color Comparison & Grading

Featuring Exclusive ColorLast™ Technology!

## Instructions & Warranty

1. After removing the CZ Master Set Pro™ from its packing materials, locate the four (4) ribbed finger grips on the front and rear sides of the case.
2. Position your thumbs on the front finger grips and your index fingers on the rear finger grips.
3. While holding the case by the finger grips, slide a thumb over and on top of the thin white rectangular safety locked opening button that is located between the front finger grips.
4. Carefully press the button with your fingernail and the lid will slowly open.
5. When closing, carefully and firmly hold the case by its finger grips and slide one of index fingers over the top of the lid and press it closed until the lock snaps into place with a click.
6. Each stone is laser inscribed on the stones table with its specific color grade. If sorting is required, use a 10X loupe to view the grades.
7. To color grade a diamond, simply place it in the middle of the grooved tray, positioned with the table (flat part of the stone) down at a 45° angle while laying the table of the stone against the front of the groove.
8. For best results, always use a task light with daylight illumination when color grading.
9. By process of elimination, lay the master stones next to the diamond until you are able to visually match the color to the diamond.
10. Store the CZ Master Set Pro™ in its case with the lid closed at normal room temperature. Never expose it to extreme heat and/or UV radiation.
