

## Introducing PMC Aqua

A versatile liquid that will revolutionize the way you work with Precious Metal Clay.

### Rehydration made easy with PMC Aqua

When rehydrating PMC with water, you need to be careful and exact about the proper amount for restoring a suitable moisture and workability.

With PMC Aqua, you can feel much easier ! It has a broader allowance and enables you to obtain a well conditioned clay even when the used amount was a bit too much.

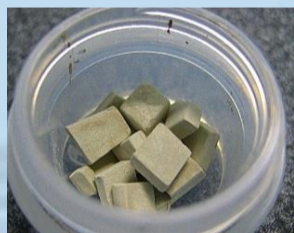

Rehydrated with excessive water

Rehydrated with excessive PMC Aqua

### Reconstitutes even dried hard clay

Dried hard clay

Clay being reconstituted

PMC Aqua added

Liquid absorbed after 12 hrs

Kneading

Reconstituted clay

Kneading completed

### Make your own sheet and syringe type clay with PMC Flex

Adding PMC Aqua to fresh PMC Flex will enhance the softness of the clay so that :

- 1) you can make a sheet as thin as 0.2mm.
- 2) you can load the clay in to an empty syringe and make your own syringe type whenever needed.

For detailed information and guidance on PMC Aqua, please contact our PMC distributors and also watch the [YouTube on-line video](#) which you will find by searching : "How to use PMC Aqua".
